UMS fishing boats

The line of UMS fishing boats consists of reliable and long-serving vessels, specially designed for professional and amateur fishing. Of course, they can be used for other activities, such as active family rest or water sports, however any fisherman will immediately feel the purpose for which these boats were created. Fishing range of the boats consists of three sizes – 545 Fishing, 585 Fishing, and 655 Fishing. Each size has its own features, which will answer the wishes of any fisherman.

UMS 655 DC Fishing

Description

UMS 655 DC Fishing is the flagship of the fishing line of UMS. Like all UMS boats, it is built using the principle of sustainability and has fully welded aluminum hull and lockers. This model embodies vast space and comfort in fishing. Due to its size, it can easily accommodate 4 fishers or a big family at the same time. And despite its size, 655 Fishing is really lightweight and offers comfortable driving even with 150 h.p. engine.

UMS 585 DC Fishing

Description

UMS 585 DC Fishing takes the middle position of the fishing line of UMS. This model was redesigned in 2022. The new shape of consoles provides modern look and higher comfort for driver and passenger. The new position of battery locker adjusts the center of the mass, which makes driving more comfortable. 585 DC Fishing excellently fits those, who like to have everything by the hand and want to fish in a company.
